

THE WEST COAST REGIONAL COUNCIL

OUTSTANDING WATERBODY NOMINATION FORM

What are your top three outstanding waterbodies on the West Coast?

We have some exceptionally spectacular 'best of the best' waterbodies here on the West Coast. They may be 'best of the best' culturally, for fishing, whitebaiting, hydroelectric generation, swimming, their sheer beauty, or for another reason.

The National Policy Statement for Freshwater Management 2020 requires Regional Councils to identify and protect outstanding waterbodies in their region, but to do this we need to hear from our community, our businesses and anyone else that may use or enjoy water resources.

An outstanding waterbody is a freshwater river, lake, stream, wetland, glacier or groundwater aquifer that is 'exceptional' in some way. It may be exceptional in relation to one particular feature, or it may have a number of features, that make it outstanding.

What are your top three outstanding waterbodies on the Coast and why are they outstanding?

Please write your answers below:

Name of outstanding waterbody	Why is this waterbody outstanding? (You must provide a reason in order for us to be able to consider it further)
Specific location of the waterbody (is it part of a river or lake? If so, which part)	

Name of outstanding waterbody	Why is this waterbody outstanding? (You must provide a reason in order for us to be able to consider it further)
Specific location of the waterbody (is it part of a river or lake? If so, which part)
