I agree with the proposed boundary of the Westport Rating District	No

Please feel free to include any additional comments below:

As a house owner in Westport township I support the project but I feel the whole district should pay. Everybody benefits in some way to Westport being warned of imminent flooding.

I agree with the proposed governance structure for the Westport Rating District Joint Committee	Yes
I agree with the proposed boundary of the Westport Rating District	No

Please feel free to include any additional comments below:

As leasee of this property we feel the whole district should be paying as everyone benefits based on arguments put forward regarding the proposition. If a rating district is established the boundaries definitely need more work! A small portion of our farm is included however we do not see any benefit being warned of flooding for that particular area. Would it mean our whole farm would be lumped in?

THE WEST COAST REGIONAL COUNCIL

Co-funding the Westport Advanced Flood Warning System

16 September 2020

Submission form – have your say

The West Coast Regional Council is currently consulting on establishing a Rating District for Westport to secure co-funding to develop an advanced flood warning system to provide a reliable 8 hour window for evacuation.

We are seeking your feedback on this proposal. For more information visit: www.wcrc.govt.nz and follow the prompts.

Your details

First name: Colleen Surname: Wilson

Rating ID: _____

Postal address: 2 Orowaiti Road
WESTPORT

Email: _____ Phone: 03-7897583

Your feedback

I support the West Coast Regional Council forming a Westport Rating District for the purpose of meeting the co-funding requirements of the advanced flood warning system for Westport to secure the co-funding of \$400,000 from Central Government.

Yes No

(I understand that by voting NO I am stating that I DO NOT want the project to proceed).

I agree with the proposed governance structure for the Westport Rating District Joint Committee

Yes No

Comments on Opinion Survey -Advanced Flood Warning System for Westport

In a recent letter to the editor of The News, Westport, I criticized your submission process for a rating district/consultation for the above flood warning system, for not providing advance information by way of a newspaper article or flyer etc.

This was as much of intellectual interest to me as anything. It did not mean I was necessarily opposed to the proposal in principle.

After all, prior to WCRC's 2017 flood consultation in Westport The News carried an advance article on the scheme in detail ('Flood Protection Options Revealed' -The News 13.1.17). Also, the well-designed flyer for the consultation also included a section on a proposed upgrade of the Buller River flood warning system - 'Hydro Site Upgrade for the Buller River Catchment' -which gave a good summary of how this worked, accessible to the layperson and not using technical terms such as 'telemetry'.

I find the rating proposal to fund the system - \$7.90 (GST incl.) per \$100,000 of capital value over three years very reasonable -if I understand it correctly, around \$40 for a \$500,000 value house/price of a decent restaurant meal and drink. I think it's extraordinary there is such a problem with this, but earlier attempts to reform rates towards CV by Buller District Council have illustrated the opposition to CV rating here that exists in principle, despite inequities affecting those on fixed incomes in low value homes BDC had been hoping to address.

It seems there is no perfect rating system, and I incline toward acting WCRC acting chief executive Robert Mallinson's definition of 'a reasonable community of interest' (News 22.9.20). Some people in wealthier areas are sympathetic, some opposed. However in your proposed rating district, clearly not all enclosed areas can be said to be 'benefiting parties', e.g Alma Road as they are not at flood risk -though I appreciate the argument that people close to town use the town's facilities.

It's a strong point that a rating district has been a precondition for other coast communities obtaining flood protection funding and will be into the future. However our mayor seems now to be wary of Westport being locked into a rigid format like this. Also, there seems to be ongoing tension between WCRC and BDC as to leadership responsibilities/roles in Westport flood protection.

The map of the proposed rating district coloured in blue seemed to imply that this area as a whole was at flood risk, which isn't the case. Also, your letter didn't say why Westport's \$10m flood protection scheme didn't meet the requirements of the Crown Infrastructure Project.

Westport's next step of building actual flood protection will likely be contentious given the strong disagreement on the value of dredging or clearing overflows & valves and stopbank options. But I think many share Chris Coll's disquiet at the atypical calm of the Buller River for so long now...like an old-time movie: 'I don't like it..it's too quiet'.

Yours sincerely

Peter Hollis

Please feel free to include any additional comments below:

QUESTION: WHAT ARE YOU GOING TO DO ABOUT THE BUILDUP OF ~~SAND~~ SHINGLE IN THE BULLER RIVER? THE SHINGLE BANK UNDER THE BULLER BRIDGE EASTSIDE IS NOW $\frac{1}{3}$ ACROSS THE RIVER. ABOVE THE BULLER BRIDGE THE SHINGLE BANK IS $\frac{2}{3}$ ACROSS THE RIVER. BOTH OF THESE INCREASE THE SPEED OF THE RIVER FLOW.

When Westport floods it will affect everyone in the Buller District - hospital, police & fire services will all be compromised so it seems reasonable as well as most workplaces, food outlets, fuel sources et. rather from only the greater district immediately affected area as proposed.

I believe the bank forming on the west side of the river above the bridge should be removed and the gravel used to raise both Stephens Road and the main road north of the Aramoana bridge. Otherwise if the Buller bridge got damaged, Westport ~~would~~ would not have any access to higher ground.

If the build up of gravel in the river was removed there would be less likelihood of flooding.
 The sale of this gravel could go towards the cost of a warning system.

Proposed boundaries need ability to be modified based on the 5 years of data that NIWA says need to be collected to improve / make flood forecast.
 Flood warning would benefit broader rate payer base than those identified currently in district outline.

I agree with the proposed boundary of the Westport Rating District	No

Please feel free to include any additional comments below:

I feel the boundaries are too broad, the people who will be affected by flooding caused by the river should pay, also there is little point spending large amounts of money protecting Westport it would be more practical to spend money relocating to higher ground.

The risk of flooding was one reason I did not move into Westport, so I feel I should not be responsible for people who choose to live there.

ADVANCED FLOOD WARNING SYSTEM FOR WESTPORT

This submission is in opposition to the proposed flood warning system and new Westport rating system.

There is already a basic flood warning system in place for Westport with gauges on the various tributaries and an alert system when these gauges trigger set levels and which therefore already allows time to alert residents in affected areas. This money would be better spent planning and implementing a flood mitigation system for Westport.

We own land collectively amalgamated under three different valuation numbers – 1884015500, 1884015200 and 1884015402 which consists of farm land plus two barns apart from our dwelling which is located on the north side of Beach Road which is outside the proposed rating area but has been included in the area according to the supplied map. The suggestion that the rating area has been created to include the residents of Westport **AND** those residents outside this area who use the services of Westport is completely flawed.

There are numerous small holdings with dwellings located on Powerhouse Road as well as a subdivision of houses and a farmhouse located off Beach Road, Fairdown who utilise the services of Westport and which have not been included in the proposed rating area. I also note that the area on the other side of the state highway south of Carters Beach has also been excluded from the proposed rating area even though this area is much closer to Westport and the residents therefore being more likely to be using the 'services of Westport' than ourselves.

The creation of a new flood warning system for Westport will not have any beneficial impact on our property. Any erosion measures beneficial to us will not be paid for by the WCRC and I therefore see no reason to pay any additional rates to the your Council on top of the approximately \$1235.00 we are already paying for which we receive little benefit already.

Please find attached map identifying the location of our dwelling on the north side of Beach Road. If this proposed rating system goes ahead this dwelling and associated land parcel (which is on a separate title) is to be removed and we will not be paying any additional rates on this.

I support the West Coast Regional Council forming a Westport Rating District for the purpose of meeting the co-funding requirements of the advanced flood warning system proposal for Westport to secure the co-funding of \$400,000 from central government. <i>I understand that by voting NO I am stating that I DO NOT want the project to proceed.</i>	NO
I agree with the proposed governance structure for the Westport Rating District Joint Committee	NO
I agree with the proposed boundary of the Westport Rating District	NO

Please feel free to include any additional comments below:

Westcoast Regional Council Rates have doubled over the last few years for my property although no reason has been given for this. Now you want to rate my property further for a project that should be funded out of existing rates as my property is on a hill 15 meters above sea level. so the boundary line is wrong and obviously just drawn on a map to encompass enough property's to pay for the project.!!
